

# Cosmostreamer

**For DJI GOGGLES 2 / DJI Integra**

**Wiring Manual**

*version 0.0.3*

# Parts needed

1. DJI Goggles 2 or DJI Integra

2. Cosmostreamer box with USB power cable out from the box

3. USB type-C to type-C cable (from Cosmostreamer box set). **It is a non-standard cable**, without a power lane (cut out 5 Volts red wire).
4. Any USB power bank or USB power supply
5. Any HDMI display or other HDMI device

## Wiring

1. Plug USB type-C to type-C cable one side into Cosmostreamer box USB-C port and another side into the Goggles2/Integra USB-C port.
2. Plug HDMI display into main HDMI port on Cosmostreamer box (nearest to USB-C port). Second HDMI out also can be used but need to enable it in Cosmostreamer settings (it is disabled by default)
3. Plug USB cable from Cosmostreamer box to any USB power supply or powerbank.
4. Power on the Goggles.

Note: Cosmostreamer box case may be different!

# Network connection

## a) Wi-Fi

1. Connect your PC/Mac or smartphone to Wi-Fi network “cosmostreamer”, default password “1234512345”
2. Open web interface in browser <http://192.168.50.1> or <http://my.cosmostreamer.com>
3. Or just run CosmoViewerNG application <https://cosmostreamer.com/apps/>

## b) Ethernet

1. Connect your Cosmostreamer box to your router or network switch
2. Open web interface <http://cosmostreamer.local>
3. Or just run CosmoViewerNG application <https://cosmostreamer.com/apps/>

## Common troubleshooting

1. I see Cosmostreamer logo on HDMI display but no video from the Goggles
  - a) *Unplug/plug again USB cable used for connection the Goggles and Cosmostreamer box*
  - b) *Check is video shows in Goggles, maybe air unit it turned off or not paired*
